EXPERIENCE

Software Development Engineer - I
Nexiaquest Ventures LLP

📅 June 2025 – Present

- Led development and deployment of scalable web applications using React.js, Node.js, and Express.js, ensuring performance and security across all releases.
- Coordinated with cross-functional teams (designers, backend developers, and DevOps engineers) in an Agile environment, managing sprint planning and feature delivery to meet business objectives.

Software Developer Intern
Talent Corner HR services Ltd

📅 May 2024 – October 2024

- Developed a job-matching web application that improved candidate-employer interaction and reduced manual outreach by 40%.
- Integrated direct communication features (email, WhatsApp) to streamline hiring workflows.

PROJECTS

Docker Lab (Desktop Application)
Docker, Kubernetes, React Js, Electron Js, Express Js, Mongodb

- Developed a scalable container orchestration lab environment using Docker and Kubernetes, streamlining technical lab deployments across platforms for educational institutions.
- **Copyright Registered (Certificate No. SW-2025021405) , Aug 2025** under Indian Copyright Act.
- Github: dockerlab

Manasheal - Mental Wellbeing (ML + Web Application)
ReactJs, Firebase, Random Forest, Linear Svc

- Manasheal is a website designed to foster mental health awareness and provide support for individuals seeking guidance, resources, and a sense of community.
- Github: manasheal

Group Expense Tracker (Mobile Application)
Andriod Studio's - Java, Sqlite

- Developed Group Expense Tracker, an Android app for precise expense recording and budget tracking in user-defined groups.
- Github: group expense tracker
